

PLEASE BE VERY ACCURATE TO INSURE A CORRECT FIT.

- | 1. Make | Model | Engine |
|---|-------|--|
| 2. Is the manifold a two or four bolt pattern? | | |
| 3. Center-to-Center on manifold studs | | . Be very specific and accurate.
This is a crucial measurement. If wrong, carburetor will not fit manifold. |
| 4. Do you need vacuum advance on throttle body? | | |
| 5. What is the out-side diameter of the air horn on the carburetor? | | |
| 6. Does the carburetor have single or double linkage? | | |
| 7. Do you need a ball stud on the carb lever? | | |
| 8. Does the engine have a governor? | | |
| | | If so, is it a velocity or mechanical governor? |
| 9. Is the existing carburetor straight or 90 degree elbow? | | |
| 10. Is this carbureted or E.F.I. engine? | | |
| 11. Is the engine water cooled or air cooled? | | |
| 12. How many cylinders? | | |
